According to E.U. & French Safety regulations, we offer you a patented system of mobile floor vertically moving in the swimming pool until complete closing, thus offering a total safety.

Product's features:

- ✓ 100% safety: access to the pool is key-locked, in conformity with current safety laws on swimming pools.
- ✓ Facility and comfort of use: depth adjustment, from wading pool height down to full depth of the swimming pool.
- ✓ Space optimization: the mobile floor can support several tons of loads, and can be used like an indoor or outdoor terrace.
- ✓ Esthetics: no more ugly and impractical fences, neither annoying alarm systems!

Competitive advantages:

- ✓ Evolutionary and patented innovative system.
- ✓ Simplicity of implementation, easy installation by any swimming pool installation specialist.
- ✓ Easy integration on existing swimming pool.
- ✓ Can be adapted to almost any shape swimming pool.
- ✓ Power unit and hydraulic actuators are never in contact with water.
- ✓ No extra digging or heavy works around the existing swimming-pool
- ✓ Very light maintenance.

Photographs of the life-size model (8x4x2meters):

- 1) Upper position, no access to swimming pool, 100% safe, full use of the surface.

2) Diving down: Intermediate position, adventure playground.

3) Adjustable depth from the wading-pool depth to full depth.

4) Full depth position, normal use of the swimming pool for adults.
